

PROFILE

Experienced Full-Stack Engineer with over 7 years of expertise in developing scalable, user-facing products in fast-paced, agile environments. Proven record of improving digital platforms and boosting user engagement in venture-backed startups. Strong collaborator with cross-functional teams and a self-starter with a passion for high-quality code and innovative solutions. Currently focused on building custom agentic solutions at scale.

EDUCATION

Engineering School of Polytech Marseille
Bachelor of Computer Science and Engineering

Marseille, France
Sept 2015 - Jun 2020

EXPERIENCE

Ivado Labs

Software Engineering (Front End) · React, AI Consulting, LLMs

Montreal, Canada
Aug 2024 - Present

- **Cost Reduction:** Developed a custom planogram solution that streamlined aisle maintenance, reducing operational costs by 12% and increasing stocking efficiency.
- **Mentorship:** Mentored junior developers, guiding them in best practices for React and Node.js, improving overall team efficiency.
- **Render Engine:** Implemented a planogram render engine leveraging SVGs in HTML, improving performance and visual accuracy for dynamic aisle layouts.

Paper Education

Software Engineer (Full Stack) · React, Vue, NodeJS, GraphQL

Montreal, Canada
May 2022 - Aug 2024

- **Customer success:** Engineered user-centric features and optimized performance, benefiting over **300K students** daily.
- **User engagement:** Launched a math practice feature achieving over **6 million completions** within months, boosting engagement by 200%.
- **User experience:** Enhanced an essay review feature used by **3000+ students**, improving their writing skills and academic performance
- **Performance:** Reduced page load times by 50% by implementing new compression algorithms, significantly improving user experience.
- **Leadership:** Provided leadership within the engineering department by presenting and conducting a migration to a new state management system.

Eye In Media

Software Engineer (Full Stack) · React, Vue, NodeJS, PostgreSQL

Montreal, Canada
Feb 2019 - May 2022

- **Customer Engagement:** Implemented a loyalty program for Place Rosemère shopping mall, engaging over **5K customers** monthly, increasing repeat visits and customer engagement.
- **Client Satisfaction:** Maintained and optimized a digital display system, ensuring seamless performance and client satisfaction, contributing to a **100% client renewal rate**
- **Maintainability:** Conducted quality assurance tests to ensure cross-browser compatibility and mobile responsiveness
- **Autonomous:** Tackled complex challenges autonomously, driving projects to successful completion
- **Mentorship:** Mentored interns, fostering their professional growth and enhancing their development skills.

PROJECTS

Mivory: As a side project, developed a simple and intuitive All-In-One bookmarking application, enabling seamless content saving, organization, and collaboration.

Hiko Tech: Designed and built a battery rental system, enabling seamless rentals, real-time tracking, and efficient battery management for users and operators.

PROGRAMMING SKILLS

Languages: TypeScript , JavaScript , HTML , CSS

Technologies: Node.js , React.js , Vue.js
